#### Hazards Identified

- ☐ Electricity  
 ☐ Confined Space  
 ☐ Stored Energy  
 ☒ Extreme Temperatures  
 ☒ Dust and or fume  
 ☒ Hazardous Manual Tasks  
☐ Psychological  
☐ Traffic/Mobile Plant  
☐ Ignition Sources  
☐ Lighting  
☐ Machinery & Equipment  
☒ Person/Object Falling  
☐ Pressure (air, water, gas)  
☒ Object Falling  
☐ Hazardous Chemicals  
☐ Hot Work  
☒ Other workers/people

### CRITICAL CONTROLS

The following critical controls must be in place and verified before work starts.

| # | Critical Control (must be in place before work starts)                                                                                                                |
|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Working at Heights risk assessment completed and all workers are trained and authorised to perform the task.                                                          |
| 2 | Safe access provided using an inspected ladder. Maintain three points of contact. Tools and materials must be raised and lowered by rope, not carried while climbing. |
| 3 | Exclusion zone established below the work area to prevent people being struck by falling tools, equipment or debris.                                                  |
| 4 | Work only undertaken in suitable weather conditions. Stop work during rain, high winds, lightning or when surfaces are wet or slippery.                               |

**If a critical control cannot be implemented, work must stop and the SWMS must be reviewed before proceeding.**

| Key Steps in Logical Order                                      | Hazards/Risks to Workers or Public                                                         | Risk Score | Control Measures                                                                                                | Residual Risk Score |
|-----------------------------------------------------------------|--------------------------------------------------------------------------------------------|------------|-----------------------------------------------------------------------------------------------------------------|---------------------|
| Climb ladder to top of truck silos using rope to bring tools up | Fall from height, slipping, dropped tools hitting people below, muscle strain pulling rope | High       | - Maintain 3 points of contact<br>- Tie tools lifted with rope tight not loose<br>- Exclusion zone below ladder | Medium              |
| Climb down onto silo top                                        | Fall from height, unstable footing, trip hazard                                            | High       | - Use designated access point only<br>- Wear harness connect to anchor point<br>- Wear non-slip footwear        | Medium              |
| Use green shovels to clean sawdust from top of silos            | Dust inhalation, manual handling strain, slips/trips on sawdust, fall hazard near edges    | High       | -Dust mask/P2 respirator<br>- Work in pairs<br>- Keep work area tidy                                            | Medium              |
| Lower tools and bags to ground with rope                        | Rope burn, dropped load, struck-by hazard                                                  | Medium     | - Tie tools lifted with rope tight not loose<br>- Maintain exclusion zone<br>- Wear gloves                      | Low                 |
| Climb down ladder                                               | Fall from height, fatigue, carrying items while climbing                                   | High       | - Do not carry items while descending<br>- Maintain 3 points of contact                                         | Medium              |

\*Add additional job steps, hazards and controls as required\*

All relevant workers must be consulted during the development and review of this SWMS and made aware of the control measures and all required permits. Worker consultation and sign-on are recorded through the online SWMS Register.

## ONLINE SWMS MANAGEMENT

Worker sign-on is completed through the online SWMS Register.

Workers are required to read and sign onto this SWMS once per review period, or sooner if the SWMS is revised, superseded, or changed due to an incident, equipment change, procedure change, legislative change, or risk assessment review.

Before each task commences, the team or person in control of the work must review the SWMS through the online task review system and confirm whether anything has changed from the approved SWMS.

If no changes are identified, the task may proceed once all workers are confirmed as current against the required SWMS.

If changes are identified, the changes and additional controls must be recorded in the online Task Record before work proceeds.

Supervisor review is required where the change affects the work method, plant, equipment, location, hazards, permit requirements, or critical controls.

## System of record

This Word document is the controlled master SWMS. The PDF is the worker-view copy. The HTML tablet page is used to view the SWMS and complete the task review.

Worker sign-off is stored in Worker\_SWMS\_Register. Daily task reviews are stored in Task\_Records. Review dates and version status are controlled in SWMS\_Library.
